Dear Steve Vincent;

I would like to take this opportunity to thank you and your company for installing Zygo's phone and data lines to our trailers. I know you were under a lot of restraints, time was definitely a factor. We were very pleased with the job performed by the installation crew.

The site foreman was Robert Gagliardi, he certainly proved to be an asset to your company. He understood all the variables explained to him by myself and Zygo's MIS Director, Mike Urban. Bob Gagliardi was very helpful with implementing the phone system layout. He made suggestions based on his knowledge and experience. His overall view was the same as ours. He was always polite, courteous and on time. He would report to me daily with project updates.

Since we are so pleased with your work we would like to offer you the opportunity to make a proposal for installing the phone and data lines for our new building addition that is currently under construction. I would like to request the same crew that installed the lines to our trailers. If it not possible to have the same crew I would like to have Bob Gagliardi as the overseer on this project.

I look forward to hearing from you at your earliest convenience.

Sincerely;

Suzanne A. Witter
Phone Administrator
